

NEW Mammography Machine

Our most ambitious fundraiser has begun, but we need your help to reach out GOAL!

Preventative screening saves lives.

Last year 467 women were examined by mammography in Losinj, and 13 breast cancers were detected. The existing unit was broken down 3 times during that period.

A new machine will be more sensitive in detecting malignant changes. Furthermore, it will allow exams conveniently and locally for the people of our islands.

Thank you for your support!
